WORK EXPERIENCE

Naver Financial (Naver Pay) **Jan 2026 - Present**
Backend Software Engineer *Seongnam*
- **Tech Stack**: Kotlin, Spring Boot, Spring WebFlux, Kafka, Elasticsearch, MongoDB
- Investigated rising JVM heap usage over four months using GC metrics, heap dumps, and code analysis, tracing the pattern to G1 mixed GC behavior rather than a persistent memory leak.
- Addressed optimistic-lock conflicts across two workflows through retry handling with jitter and input deduplication, with no final failures observed after the changes.
- Built an on-demand AI-assisted PR review workflow using Claude Code in CI, incorporating cross-repository and internal wiki context.
- Improved CI/CD pipelines by automating test execution and development-environment deployments.
